May 29, 2004

On behalf of the Integrated Chemists of the Philippines (ICP) and the entire Philippine chemistry community, I wish to extend to all our best wishes to the Federation of Asian Chemical Societies! This 25<sup>th</sup> year anniversary is a very happy occasion that all of us should celebrate, because it represents the spirit of fellowship and sharing within the Asian chemistry community.

We also wish to convey our continuing commitment to the FACS to strengthen Chemistry in the Asian region. While chemistry is an international undertaking, it takes many forms and meets different needs in each country. We hope that the FACS, together with all chemists in the Asian region, will continue to cooperate to develop the chemistry in ways that serve human society.

With our best wishes.

Sincerely yours,

Dr. FABIAN M. DAYRIT  
President, ICP
